

# EMPATHY TO IMPACT

## Building Real-World Learning, Meaningful Action & Learning Leader Capacity

IN PARTNERSHIP WITH INSPIRE CITIZENS & LUTHERAN EDUCATION

### Why Join This Program?

This five-phase professional learning journey is designed for **learning leaders and educators** who want to move beyond compliance and embed **real-world learning, meaningful action, and student agency** into curriculum and school culture.

We invite learning leaders to register and attend the two day workshop with one teaching team to develop a unit of learning using the Empathy to Impact framework. Identify a single teaching team that you can work collaboratively with and who is open and ready to refresh a unit of learning using the model. Learning leaders will be coached across the two days to model the process, facilitate ongoing collaborative planning around the model working towards the implementation of a strategic approach more broadly across the school.

Through this experience, educators will:

- Design curriculum using the **Empathy to Impact** framework
- Align inquiry, conceptual understanding, and meaningful action with the **Free to Flourish Vision for Learning**
- Strengthen investigation and reflection as core elements of learning
- Build confidence as **learning leaders and facilitators of team planning**
- Develop shared planning protocols and evidence-collection practices
- Contribute to a **coherent whole-school scope and sequence**
- Be recognised and certified as **Empathy to Impact Learning Leaders**
